

TECHNICAL FACT SHEET - LAWNS

V9-17/09/2021

SAFE LAWN

CHILD & PET FRIENDLY NATURAL LAWN FEED

BENEFIT

- Feeds all year round
- Prevents weeds naturally
- Prevents moss naturally
- Gives a greener & thicker lawn

KEY POINTS

- Greens and thickens lawns
- Friendly bacteria to break down dead leaves and moss
- Natural slow release nutrients
- Low scorch risk
- Doesn't stain hard surfaces
- Child and pet friendly

APPLICATION RATE

APPLICATION METHOD		APPLICATION RATE
Apply by hand		35g-70/m ²
Apply by Spreader		35g-70/m ²

Estimate the size of your lawn to help prevent over-application.

Adjust the spreader setting and calibrate to apply the correct rate. Visit www.gardenhealth.com for spreader setting guidance.

SPRING

Greens and thickens lawns after winter stress

Apply up to **70g** per m²

SUMMER

No scorch risk in warm weather

Apply up to **35g** per m²

AUTUMN

Strengthens lawn during harsher weather conditions in Autumn and Winter

Apply up to **70g** per m²

WHERE TO USE

Do not apply during drought or freezing conditions or when frost is expected

For use on lawns

NPK VALUE: 6-2-4 + Trace Elements

WHEN TO USE

JAN	FEB	MAR	APR	MAY	JUN	JUL	AUG	SEP	OCT	NOV	DEC

✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓ ✓

Apply every 3-4 weeks when grass is actively growing. For best results apply to the lawn after mowing and remove the clippings for soil contact.

EXPECTED RESULTS

- Lawn will be greener in 7 days.
- Stronger, healthier grass will start to outcompete weeds & moss.
- Friendly bacteria breakdown dead organic matter.
- Slow release nutrients ensure that the lawn remains well fed for even longer.
- Natural ingredients ensure that the product has a very low risk of scorching lawns, unlike most mineral fertilisers which will solubilise immediately and potentially scorching.

INSTRUCTIONS FOR USE

Turn bag/box over a few times to mix the contents:

APPLICATION: Apply the granules evenly to ensure the same result across the whole lawn.

BY HAND: Sprinkle 35 grams per square metre over the marked area.

BY WHEELED SPREADER: Apply at a rate of 35 grams per square metre with a suitable spreader.

TOP TIP: For outstanding results you can safely double the application rate. Water thoroughly after application.

PRODUCT DEMONSTRATION—RESULTS AFTER 1 WEEK

Product applied at rate of 70g/m²—July 2020

How SafeLawn Works

Micronized granules	Contain a blend of every nutrient which break down on the soil surface when exposed to moisture
Nutrient content	Encourages green growth of the plant, also strengthening and toughening new growth. Contains every essential nutrient.
Microbes	Help break down dead organic matter, like thatch and dead moss, making further nutrients available to the grass.
Feeds All Year Round	The formulation contains naturally slow release nutrients. This enables a quick and prolonged green up of the lawn, with benefits that can be seen all season long when used as per the label recommendations.
Low Risk Formula	Low salt index this means that even if a little too much is applied, the risk of damage to the lawn is still low.

FREQUENTLY ASKED QUESTIONS

Q. Will this product kill the moss and weeds on my lawn?

A. This product will not kill weeds and moss, but will encourage the lawn to outcompete them over time.

Q. Can I use this to repair the patches on my lawn?

A. It will help to thicken the lawn, however for repairing patches of damaged grass, you should use lawn seed or Smart Patch

Q. The product has quite an odour, is it safe for my children and pets to use the lawn after application?

A. Safe Lawn is made from organic material so an odour when applying the product is normal. Pets and children can use the treated areas after application with no concerns. To help reduce the odour and if pets are attracted to it water the product into the lawn following application
